

WHAT IS MOBILE PASSPORT CONTROL?

- Mobile Passport Control allows U.S. citizens to submit their passport and customs declaration information through a free, secure app on their smartphone or other mobile device. This expedites the entry process **INTO THE UNITED STATES**.
- It is the first app authorized by U.S. Customs and Board Protection for eligible travelers with a smartphone or tablet to submit their passport information and answer Customs and Border Protection inspection-related questions prior to inspection.
- The app does not require pre-approval and is **FREE** to use at 31 international airports and 4 cruise ports.
- The app streamlines the traveler's entry process into the United States by reducing passport control inspection time and overall wait time. **Travelers who successfully use the authorized MPC app will no longer have to complete a paper form or use an APC kiosk when arriving into the United States.**
